Undergraduate Research Program	
Project Name	Nautical Horror book project
Campus & Location in Mexico	Ciudad de México
Faculty	Humanities and Education
Research Area	Energy and Climate Change
Research Responsible	Antonio Alcalá González
Description of the Project	<p>Nautical Horror is a book project of my authorship currently under contract with the University of Wales Press. The contract, which I signed as a researcher at TEC de Monterrey, stipulates March 2022 as the deadline to hand in the manuscript. The book contents are centered around the historical presence of horror motifs in literature in English from the middle of the nineteenth century to the present day.</p> <p>The intention of this project is to produce an international reference for academic studies on horror literature and its connections with maritime and coastal scenarios. Additionally, I expect it will also leave an example on research done at TEC de Monterrey in the literature area.</p> <p>Although the project is a monographic study of my authorship, I require the support of a student with some experience in academic research and article writing in the humanities area so she/he can help me with final revisions, the assembling of the final manuscript, as well as indexing for the book. These are precisely the stages I will be covering next Winter which is the term I am considering for a visiting student to help me with.</p>
Training Provided	Academic manuscript development; Article publication; Writing and reading of essays / articles
Modality	Hybrid
Offered During	Winter (5 weeks)

Student	
Tasks/Responsibilities	Revision and assembling of the final book manuscript and indexing for the book.
